Tears to the anterior cruciate ligament (ACL) are the most common ligament injury that occur in the knee joint. Each year in the United States alone, approximately 125,000–200,000 patients require surgery for this injury. Thousands more try to deal with an “ACL-deficient” knee by avoiding surgery. Whether you are active in sports or work in a job that requires a strong, stable knee, an ACL tear may have devastating consequences for the activities you need and want to do on a routine basis.
