Competitive Governments : An Economic Theory of Politics ...

Competitive Governments systematically explores the hypothesis that governments are internally competitive, that they are competitive in their relations with each other and in their relations with other institutions in society which, like them, supply consuming households with goods and services. Breton contends that competition not only serves to bring the political system to an equilibrium, but it also leads to a revelation of the households' true demand functions for publicly provided

The Role of Political Economy in the Theory and Practice of Public Economics Edited by Stanley L. Winer and Hirofumi Shibata There is a long-standing difference amongst public economists between those who think that collective choice must be formally acknowledged, and those who derive their policy recommendations from a social planning framework in which politics plays no role.
