[How to Find Dimensions in Geometric Shapes | Sciencing](#)

The area or perimeter of the square has to be provided to find its dimensions. For example, suppose the area of a square is 25 square feet. Write down the area equation for a square: $A = t^2$ where "A" stands for the area and "t" stands one of the side lengths. Remember you only have to find one dimension since the square has four equal sides.
