[Ductless vs Central Air Conditioners - How to Decide](#)

In case you don't know, a ductless or mini split air conditioning system is a lot like a central air conditioner system. They both consist of two units: a condenser that sits outside the home, and an evaporator/air handler that sits inside the home. Coolant passes between the two units, carrying the heat from indoors to the outdoor unit where it is released. With a central air system
