If you have taken a logic course with a formal element, elementary text book like Sam Guttenplan's The Languages of Logic, skipping fast over what you already know, you will almost certainly need to have already done some formal logic if you are going to cope with what are Howard Kahane's Logic and Philosophy, mathematics books on areas of mathematical logic, or Patrick Hurley's Newline - Wikipedia

Therefore, in the logic of word processing and most text editors, newline is used as a paragraph break and is known as a "hard return", in contrast to "soft returns" which are dynamically created to implement word wrapping and are changeable with each display instance.

CAN bus - Wikipedia

CAN bus (ISO 11898-1:2003) the lack of a formal standard means that system designers are responsible for supply rail compatibility. ISO 11898-2 describes the electrical implementation formed from a multi-dropped single-ended

balanced line configuration with resistor termination at each end of the bus. In this configuration a dominant state is asserted by one or more transmitters switching
