[FRAGILE ECOSYSTEMS OF INDIA](#)

INTRODUCTION: Fragile ecosystems are important ecosystems, with unique features and resources. Fragile ecosystems include deserts, semi arid lands, mountains, wetlands, small islands and certain coastal areas.

[What is a fragile ecosystem - science.answers.com](#)

To be fragile means that this system can be easily damaged, it is fragile and vulnerable Why would you consider deserts tropical forest and tundra to be fragile ecosystems? The deserts, tropical forest, and tundra are considered to be fragile ecosystems because of the long regeneration time when vegetation has been destroyed. (PDF) [The Fragility of Ecosystems: A Review - ResearchGate](#)

PDF | 1. The identification of species, communities, or ecosystems that are likely to be strongly damaged by human activities (i.e. that are fragile) forms an essential part of nature conservation

[Any ecosystem is a fragile ecosystem! | Marine Science Today](#)

Why are coral reefs fragile ecosystems? Any ecosystem is a fragile ecosystem! That is, if you apply the correct pressure to it. Coral reefs are usually robust, balanced, dynamic, self-regulating ecosystems that will have greater or lesser populations of all the species of plants and animals that

[Fragile Environments \(PEER\)](#)

Some ecosystems can cope with wide variations in climatic conditions and land use impacts whereas others are much more sensitive to any environmental change. The effects of small shifts in rainfall patterns or ambient

temperatures can often do great harm to fragile environments and these effects can act as indicators of imminent threats elsewhere.

### 7.1 Fragile Ecosystems Coral Reefs | Global CCS Institute

7.1 Fragile Ecosystems Coral Reefs If leakage of CO<sub>2</sub> occurred in the vicinity of a coral reef, the inhibition of carbonate precipitation and/or dissolution of carbonate could have a devastating impact on the local ecosystem.
