Guess: $u_n = A^n$ so: $A^n - A^{n-1} = 0$ and: $w_2 - w_1 = 0$ (7:2) This is the auxiliary equation associated with the difference equation. Being a quadratic, the auxiliary equation signifies that the difference equation is of second order.

Stability Analysis for Systems of Differential Equations

The physical stability of the equilibrium solution c of the autonomous system (2) is related to that of its linearized system. Stability of the Autonomous System 1. Every solution is stable if all the eigenvalues of $Df(c)$ have negative real part. 2. Every solution is unstable if at least one eigenvalue of $Df(c)$ has positive real part.

for linear difference equations. In general, systems of biological interest will not result in a set of linear ODEs, so don't expect to get lucky too often. However, the analysis of sets of linear ODEs is very useful when considering the stability of non-linear systems at equilibrium. For that reason, we will pursue this avenue of investigation of a little while. As we did with their

Boundedness and stability of solutions to difference equations

This paper is concerned with the qualitative behaviour of solutions to difference equations. We focus on boundedness and stability of solutions and we present a unified theory that applies both to autonomous and nonautonomous equations and to nonlinear equations as well as linear equations.

The Nonlinear Optical Susceptibility Elsevier

The Nonlinear Optical Susceptibility 1.1. Introduction to Nonlinear Optics Nonlinear optics is the study of phenomena that occur as a consequence of the modification of the optical properties of a material system by the presence of light. Typically, only laser light is sufficiently intense to modify the optical properties of a material system. The beginning of the field of nonlinear
