### **PREMO A framework for multimedia middleware**

If a PREMO object type T inherits from an object type S, T is defined to be a subtype of S. Multiple inheritance, where an object type can inherit from more than one other object type, is supported in the PREMO object model. While it is useful to be able to combine features from various object types, in practice multiple inheritance introduces the potential for conflict between names (of states or operations) inherited from different sourc..

### **PREMO A Standard for Distributed Multimedia Springer**

PREMO is intended for multimedia presentation. Whereas earlier SC24 standards concentrated either on synthetic graphics or image processing systems, multimedia is considered here in a very general sense. High-level virtual reality environments, which mix real-time 3D rendering techniques with sound, video, or even tactile feedback, and their effects, are also within the scope of PREMO.

### **A Standard for Multimedia Middleware Eurographics**

PREMO (PResentation Environments for Multimedia Objects) is a project within the SC24 committee of the International Organisation for Standardization (ISO) aimed at developing an API (Application Programmer Interface) that integrates the processing and presentation of distributed multimedia with that of synthesised graphics. This report summarises the contents of the PREMO standard and explains how the integration of graphics into a general framework for media processing is achieved.
