PDF | Research concentrated in two areas, control and parameter estimation. In the control area, results were obtained in the development, analysis, and numerical testing of computational techniques.

[Research Chapter 1 - cu](#)

In its ideal form, scientific research begins with a single, carefully observed event and progresses ultimately to the formulation of theories and laws. A theory is a set of related ematic view of phenomena by specifying relationships among concepts. Researchers develop theories by searching for patterns of uniformity to explain the data that have been collected. When relationships among
