Parts of Split Air Conditioners: Outdoor Unit

The condenser used in the outdoor unit of split air conditioners is the coiled copper tubing with one or more rows depending on the size of the air conditioning unit and the compressor. Greater the tonnage of the air conditioner and the compressor more are the coil turns and rows. The high temperature and high pressure refrigerant from the compressor comes in the condenser where it has to give

Ductless vs Central Air Conditioners - How to Decide

In case you don't know, a ductless or mini split air conditioning system is a lot like a central air conditioner system. They both consist of two units: a condenser that sits outside the home, and an evaporator/air handler that sits inside the home. Coolant passes between the two units, carrying the heat from indoors to the outdoor unit where it is released. With a central air system
